MANAGEMENT DISCUSSION AND ANALYSIS:

a) <u>Industry structure and Development, Opportunities and Threats, Performance, Outlook,</u> Risks and Concerns: -

The slowing down of the economy and the existing market conditions had a downward effect on the electrical motor division during the financial year 2013-14. Despite slowdown the Company's Laboratory Instrument Division was able to register growth in the revenue but profitability is affected due to severe competition. The Company's commercial real estate project has so far done well but due to continuous slowdown in the economy, the demand and prices are stagnant.

The revenue and profitability of the electrical motor division are expected to be under stress due to de-growth in user industries and capital goods industry which is the main consumer. The Laboratory Instrument Division is expected to maintain the level of working during the current year and improve in future due to focus of the Central and State Governments on the health sector. Demand for commercial real estate project of the Company is likely to improve in coming period due to its strategic location and infrastructure development i.e. Metro Rail, etc. in the area of the project.

The Company has adequate internal control systems in technical and financial fields.
